

INFRASTRUCTURE RECOMMENDATIONS

The following infrastructure recommendation guidelines assure your system will run at maximum performance levels.

Hardware Recommendations

Recommended for up to 50 Users (Supports up to 100 Users)

Hardware

- Processor: Single 700 MHz Xeon
- RAM: 512 MB
- Controller: SCSI with Hardware RAID 5 (3 drives)
- Network Card: 10/100 Mb Network Card

Hardware - recommended for users groups of 50 or more users

- Processor: Dual 1.8 GHz Xeon
- RAM: 1 GB
- Controller: SCSI (second controller preferred) with Hardware RAID 5 (3 drives for RAID 5 – 2 for RAID 1)
- Network Card: 100 Mb Network Card

Hardware Recommendations

Large Deployment (Dedicated Servers)

Recommended for up to 150 Users (Supports up to 300 Users)

Hardware

- Processor: Dual 1.5 GB Xeon
- RAM: 512 MB
- Controller: SCSI with Hardware RAID 5 (3 drives)
- Network Card: 10/100 Mb Network Card

Hardware – recommended for user groups of 100 or more

- Processor: Dual 2 GHz Xeon
- RAM: 1 GB
- Controller: SCSI (second controller preferred) with Hardware RAID 5 (3 drives for RAID 5 – 2 for RAID 1)
- Network Card: 10/100 Mb Network Card

Hardware Recommendations

Clients

Hardware requirements

- Processor: Pentium III — 500 MHz
- RAM: 128 MB
- Network Card: 10/100 Mb Network Card

Hardware requirements (recommended)

- Processor: Pentium III — 500 MHz
- RAM: 512 MB
- Network Card: 10/100 Mb Network Card

Installation Checklist Table

Component	
Operating systems	Windows Server 2000 or greater.
Database	Advantage Server 8.1.0x. Configured Server must be joined to the same domain Advantage Server service running Network Libraries.
Internet Software	IE 7.0 or better (recommended)
